

**ROBERTO FONSECA 'LIVE IN MARCIAC'
NEW CD – DVD**

Jazz in Marciac is a festival in the south of France where the music flows between the vineyards and the sunflowers. It is a unique event, where one can enjoy great music under the stars of warm August nights.

To celebrate these special concerts, last year ago Jazz in Marciac decided to launch a collection of 'Live in Marciac' CD-DVDs. The first edition featured Wynton Marsalis & Richard Galliano, followed by Sixun. The third release will be 'Roberto Fonseca Live in Marciac', recorded during his 2009 show.

The live album's repertoire include tracks from Roberto's last two album, 'Zamazu' and 'Akokan', these tracks have been inspired by life and are dedicated to those who have most influenced his musical career. On stage Roberto was joined by the same quartet of musicians who have recorded and toured with him over the past ten years. The DVD clearly shows the dynamic musical dialogue between Roberto and his musicians.

The CD-DVD will have an exclusive pre-release at this summer's festival, where Roberto will be performing for sixth time. It will be released internationally this autumn on Enja Records, the German label has published 'Zamazu' (2007) and 'Akokan' (2009). This CD-DVD has been released in production with Montuno and Futur Acoustic.
